

Alex Example

Senior Backend and AI Engineer · Athens, Greece · alex@example.com

Summary

Backend engineer with 8 years of experience building data-heavy Python services and LLM features in production.

Experience

Nightingale — Acme Voice, Senior Backend Engineer, 2021–2024

- Designed and built the asynchronous call-analysis pipeline in Python and FastAPI, processing about 20,000 calls a day.
- Led a team of 4 engineers that shipped speech-to-text and LLM summarisation of sales calls.
- Cut transcription cost by 35% by moving batch jobs to spot instances.

Ledgerly — Ledgerly GmbH, Backend Engineer, 2018–2021

- Wrote the invoice reconciliation service in Go and PostgreSQL.
- Maintained the Kafka event bus shared by 6 product teams.

Skills

Python, FastAPI, Go, PostgreSQL, Kafka, Docker, Kubernetes, LLM APIs (Claude, OpenAI)
